International Journal for Quality in Health Care

Aims and scope

The purpose of this journal is to make available to a worldwide readership activities and research related to quality and safety in health care. The journal publishes papers in all disciplines related to the quality of health care, including health services research, health care evaluation, health economics, utilization review; cost containment, and related public policy issues, as well as all aspects of clinical research related to quality of care.

This peer-reviewed journal is truly interdisciplinary and includes contributions from representatives of all health professions, such as doctors, nurses, quality assurance professionals, managers, politicians, social workers and therapists, as well as researchers from health-related backgrounds.

The journal accepts original articles describing empirical studies and their results. Descriptions of all the organization and process of health care quality evaluation and improvement are also published, as are editorials and letters dealing with the principles, ethics and philosophy of health care evaluation.

The journal contains news of the International Society for Quality in Health Care (ISQua), including announcements of forthcoming courses, symposia and congresses. As the official organ of the Society, it serves as a forum for communication on Society activities.
